SERVICE

- Steam Boilers
- Thermal oil boilers
- Exhaust gas boilers
- Steam atom. Burners
- Pressure atom. Burners
- Rotary cup burners
- Relay/ PLC control
- Rebuilding and retrofit
- LSFO upgrade
- Price upon request

SERVICE AGREEMENT

Keeps your maintenance costs at a minimum

- Alarm checking
- Controller checking
- Positioner checking
- Combustion adjustment
- Burner cleaning
- Electrical system check
- Status report
- Recommended spares report

URGENT BACKUP

Global Boiler Aalborg knows the trouble many owners are facing when ordering spares for the BMS system. Often it is not possible to get a fully programmed controller but a standard is sent out, and afterwards the customer needs to order a service engineer to install and program the unit.

During the annual survey, we download all data from various controllers in order to enable after sale of fully operational units. We will keep record of your data, unique for each vessel ensuring optimum after sales service.
