Automation and Service

No matter if your need is urgent, onboard service, classification or retro- fit, Global Boiler Aalborg is ready to help. Our knowledge on burners and control systems makes Global Boiler Aalborg a unique partner when it comes to secure and stable boiler function. For reference, please view the spare parts overview for a selection of our most requested brands.

Services:

- Steam boilers
- Thermal oil boilers
- Exhaust Gas boilers
- Steam automated boilers
- Pressure automated boilers
- Rotary cupburners
- Relay/PLC Control
- LSFO Upgrade
- Price upon request

Service Agreement

Keeps your maintenance cost at a minimum.

- Alarm checking
- Controller checking
- Positioner checking
- Combustion adjustment
- Burner cleaning
- Electronic system check
- Status report
- Recommended spares report

Urgent Backup

Global Boiler Aalborg knows the trouble many owners are facing when ordering spares for the BMS system. Often it is not possible to get a fully programmed controller but a standard is send out, and afterwards the customer needs to order a service engineer to install and program the unit.

During the annual survey, we download all data from various controllers to enable after sale of fully operational units. We will keep record of your data, unique for each vessel ensuring optimum after sales service.
